WORK EXPERIENCE

Allegis Group

Hanover, MD

Software Development Intern

June 2025 - Present

- Implemented and maintained Salesforce components to support sales operations, resolving defects and improving data accuracy in sales opportunity records
- Led Agile stand up meetings for a team of 10+ members and engaged in sprint planning, retrospectives, etc

George Washington University - School of Engineering and Applied Science

Washington, D.C.

Undergraduate Learning Assistant

Aug 2024 - May 2025

- Assisted teaching staff in lab sections of 20+ students in Algorithms & Data Structures and Intro to Software development covering topics such as hashing, trees, graphs, sorting, OOP, etc.
- Hosted weekly office hours to provide individual support, clarify lecture materials and help students debug code and develop problem-solving strategies

TECHNICAL PROJECTS

Shopping Cart Web Application

- Developed a full-stack shopping cart web app with product search, category filtering, and real-time inventory display using Flask and SQL
- Designed and integrated SQL database to track inventory, update quantities after purchase, and display user-specific order history

Twitter Sentiment Analysis

- Analyzed a set of 10k tweets during the COVID-19 pandemic to determine the sentiment score
- Collaborated with another student using multiple Java libraries including HashMap, FileReader and Date to test multiple hypotheses using Stanford CoreNLP libraries

LEADERSHIP

GW Women in Computer Science

Washington, D.C.

Co-President (Jan 2025 - Present), Co-Events Planner (Aug 2024 - Dec 2024)

Aug 2024 - Present

- Organized the planning and execution of social and professional events including outreach to faculty and other organizations to coordinate event logistics
- Lead weekly executive board meetings with 10+ members to delegate tasks, manage timelines, and ensure effective club operations
