EDUCATION

George Washington University

Washington, D.C.

Major: Bachelor of Science in Computer Science

May 2027

Relevant Coursework: Algorithms & Data Structures, Software Engineering, Computer Architecture, Databases, Operating Systems

Clubs & Organizations: Women in CS, GW Harlan Greenhouse, Engineers Council, revTech, Society Women Engineers

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, HTML, CSS, SQL, SOQL, Apex, Kotlin

Frameworks & Tools: React, Flask, Git, Salesforce (LWC)

WORK EXPERIENCE

Allegis Group

Hanover, MD

Software Development Intern

June 2025 - Aug 2025

- Implemented and maintained Salesforce components to support sales operations, resolving defects and improving data accuracy in sales opportunity records
- Led Agile stand up meetings for a team of 10+ members and engaged in sprint planning and retrospectives

George Washington University - School of Engineering and Applied Science

Washington, D.C.

Undergraduate Teaching Assistant

Aug 2025 - Present

Databases (Spring 2026), Software Engineering (Fall 2025)

- Instructed weekly lab sessions of 50+ students to teach new skills and reinforce learning material
- Hosted weekly office hours to provide individual support for students to ask questions to increase understanding

Undergraduate Learning Assistant

Aug 2024 - May 2025

Algorithms & Data Structures (Spring 2025), Intro to Software Development (Fall 2024)

- Assisted teaching staff in lab sections of 20+ students to create an engaging learning environment

TECHNICAL PROJECTS

University System Web Application

- Spearheaded development of backend features for a university web portal using Flask and SQL, supporting student applications, course registration, and academic advising.
- Collaborated with two cross-functional teams to design, manage, and optimize the project's database system.

Twitter Sentiment Analysis

- Analyzed a data set of 100k tweets during the COVID-19 pandemic to determine sentiment score
- Collaborated with another student using multiple Java libraries including HashMap, FileReader and Date to test multiple hypotheses using Stanford CoreNLP libraries

LEADERSHIP

GW Women in Computer Science

Washington, D.C.

Co-President (Jan 2025 - Present), Co-Events Planner (Aug 2024 - Dec 2024)

Aug 2024 - Present

- Led weekly board meetings of 10+ members to delegate tasks, manage timelines, and ensure effective operations
- Organized planning and execution of social and professional events including outreach to faculty and other organizations to coordinate event logistics
